

PROMOCLEAN™ DISPER 605

Excellent
compatibility
with a wide
range of PCB
and equipments

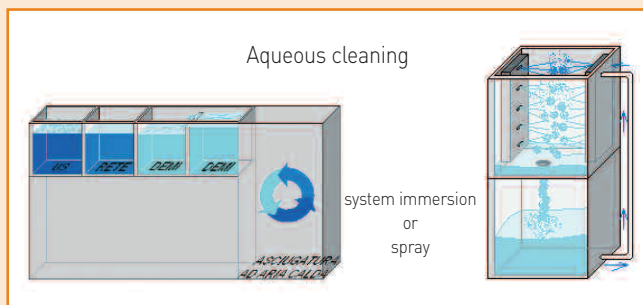

PROMOCLEAN™ DISPER 605 Especially developed to clean post soldering residues

- Promoclean™ Disper 605 is a water-based cleaning solution designed for leaded and lead free assemblies cleaning, providing very low ionic contamination on the cleaned PCB.

Specifications

Characteristics	Unit	Values	Methods
Density at 20°C	g/ml	0.96 ± 0,01	MO 0810
pH of pure product		11.9 ± 0,5	MO 0710

Waterbased solution: **PROMOCLEAN™ DISPER 605**

This product is also ideal for :

- Cleaning stencils after printing of SMT adhesives or solder pastes.
- Cleaning PCB misprints of non-cured.
- SMT adhesives or solder pastes.

Characteristics

Appearance	colorless to slightly yellow
Flash point	none
Boiling point	> 100°C
Water solubility	total
Alcohol solubility	total
Norm test	none

PROMOCLEAN™ DISPER 605 is biodegradable according to regulation 648/2004.

Cleans every no-clean solder
paste without leaving white residues
Passes military specification
SIR and ionic contamination

	Water based solution for immersion or spray system	Solvent based solution for automatic system	Solvent based solution for manual use
